

CAPABILITY STATEMENT

PROJECT MANAGEMENT
CONCEPT TO COMPLETION

ABOUT US

Our mission at Bootooloo Property is to oversee projects from concept to completion, delivering for our clients each and every time through our flexible, adaptive, and new-age approach.

Originally formed in 2006 as Finn Management Qld (FMQ), Bootooloo Property provides expert Development, design, and construction management services with a focus on industrial and commercial developments.

FMQ provided development manager services for several residential estates in Queensland, including Mode at Eight Mile Plains and Silvapark at The Gap. Silvapark being the first urban development in Australia permitted to harvest, treat and drink their own rainwater.

By 2008 our passion for the industrial sector was realized and continues to make up over 80% of our projects. Overseeing the Stage 1 infrastructure construction for the TradeCoast Central Estate including the Design and Construction management for the Schneider Road bridge, FMQ formed strong relationships with some of Queensland's best consultants and contractors – relationships that are still as strong today.

FMQ was further commissioned to manage Stages 2 – 6 of the TradeCoast Central project, completing all infrastructure works in 2014.

With the introduction of Property Management services in 2017, Bootooloo Property was born. Still, with a focus on the industrial and commercial market, Bootooloo expanded into the Property market managing the leasing and property portfolio of several smaller Brisbane developers.

We are a small team with a vast specialist network. We are experts in our field and strong supporters and pioneers for sustainable development.

OUR SERVICES

-  Site Identification: having access to some of Queensland's largest developers and agents, we know what is available and how to secure it
-  Development and Planning Approvals: have managed over 50 applications with 6 different councils throughout Queensland, we can provide expert advice and recommendations on a best-fit Town Planner to ensure the maximum realization of your development
-  Design: Bootooloo has been working with virtually the same design team for over 15 years. We can provide access for a full suite of design consultants or work with your team to ensure designs are both compliant, buildable, and aesthetic to their environment
-  Construction: whether is a full market tender or a negotiated contract, we have worked with many of the best industrial buildings throughout Queensland
-  Budget and Cost Controls: in volatile markets managing project costs has never been so important. From arranging detailed QS reports to sourcing quotes and providing working budgets, Bootooloo Property ensures your project is correctly costed and managed through to completion
-  Bootooloo Property hold \$10m in Professional Indemnity Insurance
